**Dr. Andreas Barbetseas**

Dr. Andreas Barbetseas graduated from the Dental School of the University of Athens in Greece in 2005. He received specialty training in Surgical and Prosthetic Implantology in the Department of Periodontology and Implant Dentistry of New York University, USA under Professor Dr. Dennis Tarnow (2008-2010).

In 2010 he received the New York University's Postgraduate Research Award for his postgraduate research on the peri-implant soft tissue management. During his graduate studies he pursued extensive academic and clinical training on the full range of the Periodontal and Peri-implant Microsurgery. Currently the doctor's main clinical interest is the maximization of Aesthetics in periodontal and implant care with the application of minimally invasive microsurgical techniques.

Dr. Andreas Barbetseas is the founder and Director of Education of the "ImmediaTeam International Association". The mission of the "ImmediaTeam" is to provide state of the art basic and advanced training on Oral Implantology, offering specialized clinical courses worldwide.

The doctor has been the winner of multiple clinical awards including the 1st BEGO Implant Systems' Clinical Case Award in 2013.

He is a *Diplomate* of the International Congress of Oral Implantologists (ICOI).

Dr. Barbetseas gives lectures internationally on Advanced Oral Implantology and Oral Microsurgery. He is widely considered as a leading expert on Periodontal and Periimplant Soft Tissue Management and his lectures are known for being creative, inspirational and highly educative. Numerous dentists from around the world have benefited from his pioneer courses and trainings on Immediate Implant Placement and Loading, on the application of cutting edge surgical techniques, as well as on Soft Tissue Grafting.

He has been an official administrator and director of education in the SDA Study Club by NYU, one of the most successful study clubs in Greece focused on Aesthetic Dentistry and Implantology.

Dr. Barbetseas maintains a private practice in Athens, Greece which is limited to Implant Surgical Reconstruction and Soft Tissue Grafting.

Each participant has to bring his own  
**PERIODONTAL PROBE 15mm**

## COURSE SUMMARY

If you are a dentist that seeks to combine advanced concepts with predictability in your implant treatments, aesthetic excellence with immediate treatment plans, cutting-edge surgical techniques with simplicity in every phase of the treatment, this two-day intensive training will give you all of the above and much more. The innovative course of Dr. Barbetseas will guide you from selecting the right materials and techniques for Immediate Implant Placement and Loading to the execution of the sophisticated Socket Shield Surgery through a unique series of lectures, hands-on training, live – surgery and even clinical assistance/supervision on your patients in your private clinic! The goal of this course is one. To create successful, advanced Implantologists, who manage the challenges of the Aesthetic Zone immediately with simple and predictable interventions.

## OPTIONAL ADDITIONAL TRAINING

**– Training in private practice of practitioners in Croatia**

Clinical training on "The Socket – Shield Technique in the Aesthetic Zone" in each participant's private practice on patients of the participant. Each participant will complete up to two cases of Socket -Shield – immediate implant placement and loading (one immediate implant in each case), under the Instructors' assistance/supervision. The participant is responsible for the procedures, and the Instructor will assist to set up and execute the surgeries in a way that is optimum for the patient and compliant with the clinical standards of ImmediaTeam. The Instructor will spend one day in the private practice of each participant (one surgery in the morning and one in the afternoon). The participant will take the impression of each one of these two immediate implants after each surgery, and the provisional restorations will be delivered in separate appointments, without the supervision of the Instructor (photos of the provisional and final restorations, as well as x-rays, should be sent by the participant to the Instructor for the final evaluation of each case and the successful completion of the clinical part of the program). The participant will then receive his/her "**Master in Advanced Aesthetic Implantology**" certificate from ImmediaTeam.

**PRICE: 700 € + Tax for each surgical case**  
(cases of one immediate implant + socket shield)
